

Practical no:1

Question: Write a program to calculate Simple Interest.

Program:

```
#include<stdio.h>
#include<conio.h>
Void main()
{
float p,n,r,si;
clrscr();
printf("enter p,n,r:");
scanf("%f%f%f",&p,&n,&r);
si=p*n*r/100;
printf("\n i=(%f*%f*%f)/100=%f",p,n,r,si);
getch();
}
```

Output:

```
enter p,n,r:50000
5
10

i=(50000.000000*5.000000*10.000000)/100=25000.000000
```
